// CUSTOM GOALIE

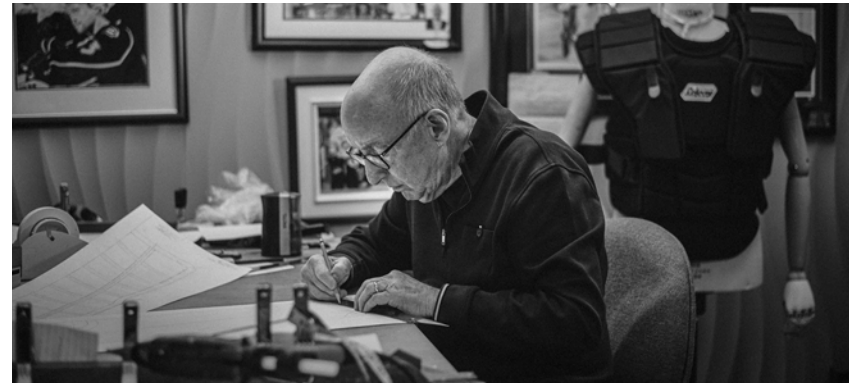

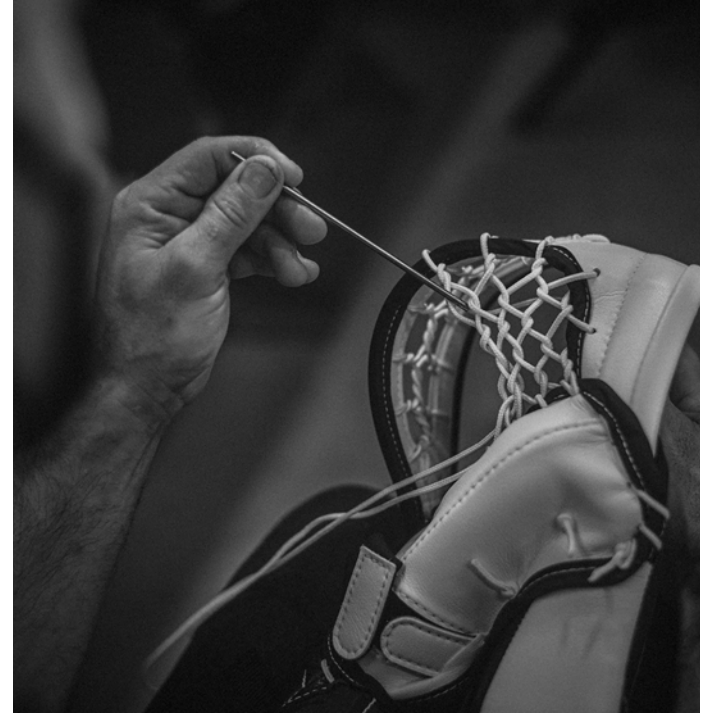

# PROUD TO INTRODUCE OUR CRAFTED BY LEFEVRE 2023 CUSTOM GOALIE COLLECTION

Lefevre started making goalie masks in the basement of their family home in 1967. They created their first pads in 1987. After more than 25 years of designing and manufacturing products for other companies, Lefevre made history and launched its own line in 2020.

Since 1967, Lefevre has been delivering products inspired by function and crafted by form for goalies performing at all levels of the game.

**FAMILY-RUN, FUELED BY PASSION.**

# CATALYST

## L87

## L20.2

The Catalyst PX3 is an evolution of the L12.2 line offering a thinner thighrise that allows an easier overlap at the top. A stiffer Knee Stack allows the pad to be more responsive when you drop on the ice. Keeping the longer FRS to giving you more support at the ankle and skate.

BOOT FLEX	FLEX & MID STIFF
BOOT ANGLE	REGULAR & OPEN
BOOT & LEG CHANNEL	NO
BREAK (CORE & OUTER ROLL)	SINGLE BREAK & NO BREAK

The L87 shares the same specs as the Catalyst PX3, but was designed for the goalie wanting a retro look.

BOOT FLEX	FLEX & MID STIFF
BOOT ANGLE	REGULAR & OPEN
BOOT & LEG CHANNEL	YES
BREAK (CORE & OUTER ROLL)	SINGLE BREAK & NO BREAK

The L20.2 pads were designed with a flat leg and boot channel along with a shorter FRS at the calf, giving you more freedom of movement at the angle and skate. The Fast Rotation System (FRS) keeps your legs connected to the pads, making them very responsive without compromising rotation when dropping to the ice.

BOOT FLEX	FLEX & MID STIFF
BOOT ANGLE	REGULAR & OPEN
BOOT & LEG CHANNEL	YES
BREAK (CORE & OUTER ROLL)	SINGLE BREAK & NO BREAK

# CATALYST PX3

ENGINEERED FOR GREATER MOBILITY

THE CATALYST PX3 ARE DESIGNED TO FACILITATE THE OVERLAP MOVEMENT AT THE TOP OF THE PAD WITH A THINNER THIGH RISE WITHOUT COMPROMISING RIGIDITY BY ADDING A NEW COMPOSITE CORE.

## FRS (FAST ROTATION SYSTEM)

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution.

## 1 NEW COMPOSITE THIGH RISE CORE

A 30% stiffer thigh rise is combined with more rigid knee stack, allowing for a better seal to the ice when dropping down an improved ease of redirecting pucks.

AVAILABLE SIZES:  
SEE SIZING CHART

## 2 THINNER THIGH RISE

A 40% thinner thigh rise provides ease in pad overlap when standing up or in butterfly. The pads are more reactive when dropping down and popping back up from the ice, giving greater mobility in game situations.

## 3 IMPROVED KNEE STACK RIGIDITY

New knee stack construction and improved rigidity provides greater stability. Combined with the stiffer thigh rise, it allows for more pressure on top of the pads in butterfly, leading to an even better seal to the ice.

# L20.2

ENGINEERED FOR FREEDOM OF MOVEMENT

THE L20.2 PADS ARE DESIGNED TO FIT CLOSER TO THE LEG AND THE FLAT FACE ALLOWS A BETTER REBOUND CONTROL.

## FRS (FAST ROTATION SYSTEM)

Located on the calf, FRS includes double internal adjustable straps for increased stability and even weight distribution.

## 1 SEAL TO THE ICE

The top of the pad is made entirely of high-density foam, which allows for a superior seal to the ice.

## 2 FREEDOM OF MOVEMENT

Better skate and ankle mobility due to a flat leg and boot channel and shorter FRS.

## 3 FLAT FACE LOOK

Allows for more predictable rebounds versus knee rolls.

AVAILABLE SIZES:
